Standing at 146 meters at first, it is currently 137 meters tall, with its summit facing the largest Orion Belt constellation. From a spiritual perspective, it is crucial since it symbolizes the crown chakra. Many tombs belonging to the builders who collaborated in the Pyramids' construction were discovered in and around them.

The Great Sphinx

A massive sculpture featuring the head of a pharaoh and the body of a lion carved from a single block of limestone. With certain compartments inside its body, the statue is 20 meters high and 73 meters long. It has been suggested that [the Sphinx](#) is linked to both the astral portals and the third eye chakra.
